	Smartphones are small de	evices constantly online ser	nding and receiving signals	s, so they are always a target for		
crim	inals. To protect your sma	rtphone from hackers and	36, set a long passcoo	de with both numbers and letters.		
Cons	sider using fingerprint scar	nning or face ID, 37 g	gives an even more persona	lized security blanket. Avoid free		
publ	ic Wi-Fi. Use only your pr	rivate cell connection and _	38 Wi-Fi on your mol	pile phone whenever you are in a		
publ	ic place. Besides, avoid sh	naring a ton of revealing in	nformation about yourself	on social networks. Avoid listing		
spec	ific addresses, work locatio	ns, phone numbers, family n	names, and other details hacl	kers can use to track you. <u>39</u>		
don'	t store personal information	n, documents, or files on yo	our phone, and limit the nur	mber of geotagged photos in your		
Cam	era Roll. Eliminate 40	_ emails from financial and	d work-related accounts. Al	lso, make a habit of keeping your		
phor	ne relatively pristine by offl	loading images and docume	nts to your computer.			
36	(A) advocates	(B) counterparts	(C) intruders	(D) vendors		
37	(A) it	(B) that	(C) this	(D) which		
38	(A) switch on	(B) switch off	(C) turn up	(D) turn down		
39	(A) Furthermore	(B) However	(C) For example	(D) On the other hand		
40	(A) ambigious	(B) confidential	(C) disciplinary	(D) inherent		
請依	下文回答第 41 題至第 45	5題:				
	Carol Dweck suggests that	t most people's brains can b	be described as having a fix	ed or a growth mindset. Someone		
with	a fixed mindset avoids ne	w challenges 41 fear	of failure, whilst someone	with a growth mindset sees new		
problems in everyday life as 42 to be seized and embraced as part of a wider learning experience. Those with a						
fixed	l mindset claim that skills	and abilities are 43, b	ut Dweck argues that most	successful people tend to have a		
growth mindset and an ongoing desire to learn and develop personally throughout their life. 44 aware of our						
resistance to change, it is possible to train ourselves to overcome this resistance and expose ourselves to new activities.						
Put yourself out of your45 and give it a go. You will be surprised at how you will develop new ways of thinking						
through trial and error and how this will improve your resilience and flexibility.						
41	(A) as	(B) without	(C) away from	(D) out of		
42	(A) accidents	(B) frequencies	(C) opportunities	(D) tragedies		
43	(A) abstract	(B) objective	(C) innate	(D) eligible		
44	(A) Not become	(B) Have become	(C) Becoming	(D) Became		
45	(A) culture shock	(B) comfort zone	(C) safety belt	(D) generation gap		

## 請依下文回答第46題至第50題:

The marketing term "effective frequency" refers to the idea that a consumer has to see or hear an ad a number of times before its message hits home. Essentially, the more you say something, the more it sticks in—and possibly on—people's heads. It doesn't even have to be true—and that's the problem. What advertisers call "effective frequency," psychologists call the "illusory truth effect": the more you hear something, the easier it is for your brain to process, which makes it feel true, regardless of its basis in fact.

"Each time, it takes fewer resources to understand," says Lisa Fazio, a psychology professor at Vanderbilt University. "That ease of processing gives it the weight of a gut feeling." That feeling of truth allows misconceptions to sneak into our knowledge base, where they **masquerade** as facts. One example Fazio and her research team give is the belief that vitamin C can prevent colds, which many people have taken as a fact but is actually a misconception simply because it is long repeated.

Even in the absence of endless repetition, we're more likely to believe what we hear than to question it objectively, thanks to another psychological principle: confirmation bias.

"In general, human beings, after hearing any claim, behave like naive scientists and tend to look for information that confirms the initial conjecture," says Ajay Kalra, a marketing professor at Rice's Jones Graduate School of Business. "In an interesting experiment, a group of consumers was told a leather jacket, Brand A, was very good. When **they** later examined several brands, they tended to spend more time looking at Brand A and evaluating it more highly than other brands."

The same principle applies to a coffee company's claim that its coffee is the "richest" in the world. "Confirmation bias typically applies to situations where information is ambiguous and hard to refute," he explains. "The more often you hear a message, the more the confirmatory bias likely comes into play."

It's no wonder that many of us fall for false claims on social media, especially when we see them tweeted and retweeted again and again. How can we fight back? There are ways to lessen the influence of repeated claims. One of the best: don't rely on a single source for information. Read stories from multiple news outlets and listen to a variety of opinions. Commit to staying open-minded, and consult with friends and colleagues whose perspectives differ. Take a second to consider how you know something is true. In this way, you can stymie the effects of repetition. It's a great thing to do on social media: before you share something, take that second and pause. Otherwise, you risk becoming part of the echo chamber that keeps falsehoods circulating.

of th	ne echo chamber that keeps	falsehoods circulating.			
46	What is the purpose of the passage?				
	(A) To entertain the readers.		(B) To inform the readers.		
	(C) To mislead the readers.		(D) To criticize the readers.
