Most travelers have a preference for window or aisle seats when it comes to air travel, but have you ever given thought to which side of the plane you should sit on? We polled some passengers about which side of the aisle they prefer—here's what they suggest when selecting your seat on an airplane. Potential Views—If you prefer a window seat, you might want to check your potential flight path before picking a side. "I really like the window seat and often try and predict which side will have a better view based on the logical flight path into the airport," says Richard Campbell, founder of Travel Platform. "I still remember my first international flight almost 25 years ago. I was flying into London Heathrow and sat on the right-hand side of the plane, looking out on the Thames and central London as we circled over the city for our approach into the airport. What a way to start a trip!" But keep in mind that **no matter how much research you do, your flight might have other plans**. What's Going on in the Sky—It's not all about

the view below you. “If I’m flying a polar route, I try to be on the side of the plane that will face north during local nightfall in case I have an opportunity to witness the northern lights,” says atmospheric scientist Matthew Cappucci. But if you’re flying on a daytime flight, the sun is a more important consideration. “Since I don’t like having the sun in my eyes, I try to sit on the opposite side of the sun,” says Cappucci. “Sitting on the sunny side also means being on the noticeably warmer side of the plane.”

**Sleeping Preference**—Do you tend to lean right or left when dozing off on a plane? If you’re one to sleep on planes, you’ll probably find yourself leaning one way or another as you drift off. “I prefer the right side of the plane, next to the window, when booking economy. I love looking out the window, but more importantly, I tend to lean to the right when I fall asleep, especially on long-haul flights,” says Dominika Dryjski, an operating officer. **Right-handedness or Left-handedness**—This might be a smaller consideration for nonbusiness travelers, but if you plan on working from a flight, consider your dominant hand. “As a right-handed person, I prefer to sit on the left side of the plane, in an aisle seat, as this makes it easier to work on a laptop if there’s work I have to do,” says John Lyotier, CEO of a travel magazine.

- 71 What is the best title for this passage?
- (A) Choosing a seat for your flight (B) Getting work done during your flight  
(C) Why passengers prefer window seats (D) How to sleep better on a plane
- 72 What would passengers expect to see when flying a polar route?
- (A) The aurora borealis (B) The Thames and central London  
(C) The atmospheric circulation (D) The southern hemisphere
- 73 According to the passage, if a passenger tends to lean to the right when falling asleep, what will be the best seat for the passenger?
- (A) A window seat on the right side of the plane (B) An aisle seat on the right side of the plane  
(C) A window seat on the left side of the plane (D) An aisle seat on the left side of the plane
- 74 What will be the best seat implied by the article for a passenger who is left-handed and has work to do?
- (A) An aisle seat on the left side of the plane (B) A window seat on the left side of the plane  
(C) An aisle seat on the right side of the plane (D) A window seat on the right side of the plane
- 75 According to the passage, what does the sentence “... no matter how much research you do, your flight might have other plans” suggest?
- (A) Flight paths may change.  
(B) You may cancel your travel plan.  
(C) Research on flight plans is essential.  
(D) Airline fuel surcharges vary.

During the pandemic, the cruise industry faced many challenges and financial losses. The cruise ship The Braemar was denied entry to the Bahamas after several passengers tested positive for COVID-19. The Diamond Princess was quarantined for a month in Japan as the virus spread onboard. The Diamond and the Ruby had death cases, 9 and 28 fatalities, respectively. Almost overnight, these luxury liners became symbols of death and contagion. Even some critics claimed that the global cruise industry was sinking.

However, the Braemar changed its name to Odyssey and heralded a new era. Nowadays, the notion of **perpetual** cruises—where passengers live full-time on cruise ships—has attracted widespread attention of the wealthy. Despite some technical issues, the Odyssey eventually embarked on the voyage and offered passengers an alternative lifestyle at sea, where the ship serves as a floating home.

Unlike traditional vacation cruises, the Odyssey offers a new growing trend: cruises are a new living option for the rich. Passengers can purchase or rent cabins for up to 15 years. The prices range from \$99,999 to \$899,000, based on the cabin size. Only mid-range cabins are available, and two-thirds of them have been sold or rented. One of the critical elements is a sense of ownership, as they can customize their cabin to their liking. Also, wealthy residents do not want to share their space with tourists.

Following a Manhattan-style co-op, the cruise ship The World was relaunched in 2002 and is still the world's only residential community at sea, ensuring exclusivity and ownership to its residents. However, this business model has faced challenges, such as managing short-term tourists and long-term residents. Another challenge was that they may grow sick of the sea after spending a long period of time. To address these issues, the residents decide the ship's itinerary, with stops every two or three days and no return to the original port of departure for at least three years. The ship Odyssey followed a similar business model of the ship The World and updated services, providing long-term living options for the wealthy. While living at sea full-time is not the norm for most people, it is clear that this trend is gaining popularity among the wealthy. With more ships being designed to accommodate long-term residents and offer more exclusive services, the idea of a perpetual home at sea is becoming a **viable** option for those who can afford it.

- 76 According to the passage, what is the main feature of the Odyssey?
- (A) No passengers can afford the price.
  - (B) Passengers can rent cabins for up to 15 years.
  - (C) It provides only short-term leisure vacations.
  - (D) Adventure and exploration are not provided.
- 77 What makes the Odyssey different from traditional cruise ships?
- (A) It offers only short-term vacations.
  - (B) It is the largest cruise ship in the world.
  - (C) It provides long-term living options.
  - (D) It sails around the same region all year.
- 78 What challenge did "The World" face when it was first launched?
- (A) Lack of interest from potential buyers.
  - (B) Poor onboard amenities.
  - (C) High operating costs.
  - (D) Difficulties managing short-term guests and long-term residents.
- 79 What does the word "**perpetual**" (in the second paragraph) mean?
- |               |                |               |                  |
|---------------|----------------|---------------|------------------|
| (A) Temporary | (B) Occasional | (C) Expensive | (D) Never-ending |
|---------------|----------------|---------------|------------------|
- 80 What does the word "**viable**" (in the last paragraph) mean?
- |              |               |                 |                 |
|--------------|---------------|-----------------|-----------------|
| (A) Unlikely | (B) Practical | (C) Undesirable | (D) Unnecessary |
|--------------|---------------|-----------------|-----------------|
