"Try before you buy" is a time-tested marketing approach that has become even more significant in the aftermath of COVID-19. This shift in behavior was supported by a survey, which found that 80% of women were concerned about product safety. Offering free sachet samples can also drive sales by 18 new customers and strengthening customer loyalty. This strategy taps into the psychological concept that people feel obliged to reciprocate when they receive something beneficial. By distributing free cosmetic samples, businesses can engage 19 new customers while also keeping existing customers interested. The most obvious advantage of providing samples is that it allows customers to make 20 purchasing choices. They can know the product firsthand, learning about its color, fragrance, and effectiveness. Overall, offering free cosmetic samples is an effective way to boost sales.

四、閱讀測驗【請依照段落上下文意，選出最適當的答案】

Only a few Europeans lived in North America in the sixteenth century, with most of their population settled on the northeast coast. In 1587, a small group of about one hundred people decided to go south to establish a new colony. They moved to the small island of Roanoke, located at what is later known as the state of North Carolina. Unfortunately, the Roanoke settlers were not well prepared, without enough food for the winter, nor sufficient grain for future crops. Their leader, Captain White, decided to sail back to England to get supplies. However, England was at war with Spain and three years had passed before he could return to North America. When Captain White came back to Roanoke in 1590, he was eager to see the settlers but no one was there to greet him. There were no signs of life and the entire settlement was deserted. The reason why the Roanoke settlers disappeared has remained unknown. Many people thought that hostile Native Americans killed them, but there were no signs of a fight. Some guessed that the settlers died from hunger or disease, but they could not explain the absence of bodies. Many years later, more settlers came to North Carolina. One of these newcomers met a group of native people called the Lumbee, who were unusual-looking compared to the black-haired, brown-eyed Native Americans in the north. Most Lumbee had blonde hair and gray eyes, and spoke an odd kind of English. He asked where they were from, but none of them knew, only saying that their grandparents “talked from a book.” Did they mean that their grandparents were able to read? As he rode back home, he kept wondering: Were the Lumbee people the descendants of the Roanoke settlers? Today, people are still asking the same question, but a lack of written records has put the answer in mystery. However, there is one interesting fact: Some of the Lumbee people have family names like Sampson, Dare, and Cooper, which are identical to the names of the vanished settlers of Roanoke Island.

- 【2】21. Why did the Roanoke settlers decide to leave their original location on the northeast coast?
- ① They were forced to relocate by the Native Americans.  
② They wanted to move to a new area further south.  
③ They tried to seek new trade routes to get richer.  
④ They were attracted by the Gold Rush in the west.
- 【1】22. Which of the following is true about Roanoke or Roanoke settlers?
- ① Roanoke was small in area and surrounded by waters.  
② Roanoke settlers were doing great in their settlement.  
③ Roanoke was located inside where North California is now.  
④ Roanoke settlers welcomed Captain White back from England.
- 【3】23. What delayed Captain White's return to Roanoke with supplies?
- ① He lost his way when getting back to North America.  
② He came down with a disease and recovered very slowly.  
③ He couldn't leave Europe due to a conflict between two countries.  
④ He had to collect enough funds to buy the necessary supplies.
- 【4】24. Which of the following is **NOT** one of the guesses about the reason for the disappearance of the Roanoke settlers?
- ① A massacre.  
② A health threat.  
③ A famine.  
④ A tribal curse.
- 【3】25. Which of the following is the strongest evidence that the Lumbee people could be descendants of the Roanoke settlers?
- ① Their English accent.  
② Their traditional outfits.  
③ Their last names.  
④ Their life style.
