The southern white-faced owl is a fairly small owl in the family Strigidae. It is native 41 the southern half of Africa. It inhabits savanna and dry woodland. It is usually seen alone or in pairs. It mainly hunts large insects, as well as the occasional small mammals, birds and reptiles. 四、閱讀測驗【請在下列各題中選出最適當的答案】

Parasite, the stealth hit by legendary director Bong Joon-ho, is a twisted tale of the haves and have-nots. The extreme **disparity** between the two families - the affluent Parks and the poor Kims - is shown through their two homes. One a gleaming mansion up on the hills above Seoul; the other a dingy semi-basement. In real-life Seoul, though, banjihias are where thousands of young people end up living, while they work hard and hope for a better future.

The banjihias are not just a quirk of Seoul architecture, but a product of history. These tiny spaces actually trace their roots back decades, to the conflict between North and South Korea. In 1968, North Korean commandos slipped into Seoul on a mission to assassinate South Korean President Park Chung-hee. The raid was thwarted, but the tension between the two Koreas intensified. That same year, North Korea also attacked and captured a US Navy spy ship, the USS Pueblo. Armed North Korean agents infiltrated South Korea, and there were a number of terrorist incidents. Fearing an escalation, in 1970 the South Korean government updated its building codes, requiring all newly built low-rise apartment buildings to have basements to serve as bunkers in case of a national emergency. Initially, renting out such banjiha spaces was illegal. But during the housing crisis in the 1980s, with space running short in the capital, the government was compelled to legalize these underground spaces to live in. In 2018, the UN noted that despite having the world's 11th largest economy, South Korea's lack of affordable housing was a substantial barrier - particularly for young people and poorer people.

For under-35s, the rent-to-income ratio has remained at around 50% during the last decade. So the semi-basement apartments have become an affordable response to rapidly-growing housing prices. Monthly rents are around 540,000 Korean won (\$453), with average monthly salaries for people in the 20s around 2m won (\$1,679). Nevertheless, some banjiha dwellers struggle to overcome the social stigma. But not all.

- 【4】46. Which of the following titles best describes the passage?
① Introduction to Parasite, the Oscar winning movie.
② Banjihias that help decrease the rent-to-income ratio.
③ On-going tension between North Korea and South Korea.
④ Reasons that people still live in banjihias in the 21st century.
- 【3】47. What does the word **disparity** in the first paragraph mean?
① Poverty.
② Similarity.
③ Difference.
④ Indifference.
- 【1】48. Which of the following statements about North Korea is NOT true?
① North Korean terrorists helped decrease the rent-to-income ratio from 50% to 30%.

③ North Korean army once tried to assassinate the President of South Korea but eventually failed.
④ North Korean agents succeeded in creating terrorist incidents to escalate the tension between the two countries.
- 【2】49. How did banjihias become important in Seoul?
① They could be easily built in Seoul in 1970s with the help of North Korean soldiers.
② They were affordable for younger people and poorer people during the housing crisis.
③ They were low enough for banks in Seoul to handle nation-wide emergencies in 1980s.
④ They were needed greatly because North Korean commandos needed places to hide themselves.
- 【1】50. Which of the following phrases is closest in meaning to a banjiha?
① Semi-basement apartment.
② South Korean housing crisis.
