

第一銀行 113 年第二次新進人員甄選試題

甄選類別【代碼】：一般行員 A【A22107101-A22107116】、一般行員 B【A22107117】、
一般行員 C【A22107118-A22107121】、業務菁英人才【A22107122】、
專案助理理財人員【A22107126】、程式開發人員【A22107127】、
資深程式開發人員【A22107128】

共同科目：英文

*入場通知書編號：

注意：①本試卷為一張雙面，測驗題型為四選一單選選擇題共 50 題，每題 2 分，共 100 分。
②單選選擇題題型，請選出一個正確或最適當答案，答錯不倒扣；以複選作答或未作答者，該題不予計分。
③請勿於答案卡上書寫應考人姓名、入場通知書編號或與答案無關之任何文字或符號。
④答案卡務必繳回，未繳回者該節以零分計算。

一、字彙【請依照句子前後文意，選出最適當的答案】

- 【3】1. Rick could have said something for his neighbor on this matter, but he chose to keep _____.
① promise ② money ③ silence ④ habit
- 【1】2. I can't talk to you on the phone during the meeting, but I can _____ you instead if you don't mind.
① text ② send ③ dump ④ hire
- 【4】3. The rope holding the horse was getting _____, so it ran away when hearing the gunshots.
① crazy ② broad ③ harsh ④ loose
- 【2】4. There are many _____ on the roads in this area to slow down the passing traffic.
① seats ② bumps ③ pools ④ tales
- 【4】5. That man has a wife but he lied about it by checking the box "single" in the _____ status on the form.
① mental ② financial ③ loyal ④ marital
- 【2】6. The company doesn't have enough _____ to build more factories because it is in serious debt.
① career ② capital ③ casualty ④ campaign
- 【3】7. Her paintings are _____ as the most important works of art in the 20th century.
① taunted ② loathed ③ reckoned ④ censured
- 【2】8. New technology has made devices smaller and more _____, so people can easily carry them anywhere.
① heavy ② portable ③ broken ④ strong
- 【1】9. Before publishing any scientific data, researchers must ensure their findings are _____ and can be replicated.
① valid ② inconclusive ③ outdated ④ questionable
- 【4】10. A _____ approach to agriculture ensures that resources are preserved for future generations.
① short-term ② temporary ③ fragile ④ sustainable
- 【1】11. New farming techniques have been developed to _____ the irrigation process in areas with limited water resources.
① facilitate ② complicate ③ hinder ④ obstruct
- 【3】12. In marine biology, it is essential to _____ the conservation of endangered species above other research topics.
① disrupt ② undermine ③ prioritize ④ acclimate
- 【3】13. It was very hot in the room because the air conditioning _____ cooled the room.
① chilly ② lively ③ barely ④ fashionably
- 【2】14. The _____ animals were examined at least twice daily for signs of clinical illness.
① obedient ② experimental ③ persuasive ④ intensive
- 【4】15. The beautiful cloisters of the ancient abbey, one of the oldest in Germany, are still in fair _____.
① suggestion ② objection ③ evaluation ④ preservation

二、文法測驗【請在下列各題中選出最適當的答案】

- 【2】16. Remember _____ all the doors and windows or someone may come in and steal things.
① lock ② to lock ③ locking ④ must lock
- 【1】17. The young man bought a bankrupt online business Spaceman, _____ was once rated among S&P 500.
① which ② who ③ he ④ that
- 【2】18. Janet is leaving _____ Hong Kong tomorrow and she will meet her boyfriend there the day after.
① with ② for ③ from ④ to

- 【3】19. _____ in Florida in 1995 as small business, the company has grown into a multinational conglomerate.
① Found ② Founding ③ Founded ④ Finding
- 【4】20. _____ it not for her help, I would not be who I am now.
① If ② Should ③ Had ④ Were
- 【2】21. The sales forecast _____ improve next quarter if market conditions remain stable.
① is ② may ③ must ④ to
- 【4】22. The final report usually _____ by the accounting department before it is submitted to the board.
① review ② reviewing ③ reviews ④ is reviewed
- 【1】23. _____ by the unexpected market shift, the marketing analyst called an emergency meeting to reassess the strategy.
① Surprised ② Surprising ③ Surprise ④ She was surprised
- 【3】24. By the time the curator arrived, the team _____ the entire exhibition layout.
① completes ② completed ③ had completed ④ has completed
- 【2】25. The mayor told people _____ their conversations outside.
① to not take ② not to take ③ to not taking ④ not to taking
- 【4】26. The US presidential debate on September 10 draw _____ viewers.
① great deal of ② a great deal of ③ lot of ④ a lot of
- 【3】27. This mountain is lower than _____ of the surrounding hills.
① that ② it ③ those ④ these
- 【1】28. Cooking should be a _____ balanced reflection of all the good things of the earth.
① carefully ② careful ③ careness ④ care
- 【3】29. At present the parcel _____ from Taiwan and still hasn't arrived in Singapore yet.
① ships ② shipped ③ is being shipped ④ was being shipped
- 【2】30. Hardly _____ these words when the door opened and Arion himself stood before them.
① they had spoken ② had they spoken ③ they speak ④ do they speak

三、克漏字測驗【請依照段落上下文意，選出最適當的答案】

第一篇：

Off the coast of Japan, some women in their eighties search underseas for abalone. These 31 are called the *ama*, the women of the sea. They hunt the same way it has been done for thousands of years. They dive without oxygen tanks, so they must be able to 32 for a long time. They don't wear wet suits; more divers are women because they usually have more 33 to better protect their bodies from the cold. Seeing their job as an honor to maintain the unique tradition, the *ama* are 34 of their work and most of them have been diving for over 50 years! The abalone they harvest 35, so the *ama* can make lots of money in diving season.

- 【4】31. ① smart creatures ② energetic youths ③ brave pilots ④ senior females
【3】32. ① leave their home ② sacrifice their life ③ hold their breath ④ shut their eyes
【2】33. ① freedom ② fat ③ nerves ④ clothes
【1】34. ① proud ② afraid ③ shy ④ tired
【3】35. ① die very soon ② escape quite easily ③ earn top dollars ④ decrease every year

第二篇：

The rise of AI deepfakes has created both excitement and concern. These AI-generated videos can make it look like someone is saying or doing things they never 36 did. It is estimated that by 2030 deepfakes will become a serious 37 to trust and security. If companies had invested in better detection software earlier, deepfakes 38 so common today. Developers must work 39 to create tools that can detect these fakes quickly. Many experts agree that AI will continue to play a 40 role in our lives. Its ethical use is crucial for the future

- 【3】36. ① relatively ② fairly ③ actually ④ secretly
【2】37. ① base ② threat ③ stake ④ halt
【4】38. ① would have been ② wouldn't be ③ won't be ④ wouldn't have been
【2】39. ① barely ② thoroughly ③ suddenly ④ hardly
【1】40. ① major ② partial ③ common ④ fast

【請接續背面】

四、閱讀測驗【請依照段落上下文意，選出最適當的答案】

第一篇：

In many professional sports games across the United States, players, coaches and referees are not the only people on camera. Every fan is of interest to security officials, who would use tiny, hard-to-see cameras to capture a shot of each person who passes through the stadium gates. The organizers of any huge athletic event have to anticipate trouble and try to stop it before it starts.

Security officials hope to do so by using machines that recognize faces. Each face seen by the gate-mounted cameras is compared to the data in local and federal law-enforcement computer systems. The data includes photos of people previously arrested for stealing, causing fights, and other illegal activities. If a fan's picture matched one in the database, security officials could closely monitor him or her and perhaps even make an arrest.

Not everyone thinks this kind of surveillance is a good thing. It has stirred some controversy about possible threats to the privacy rights of individuals. People being captured on camera are not told their pictures are being taken. In addition, the technology has not been proven to be reliable. What if the system points out an innocent person as a criminal by mistake?

Security officials say the face-recognition system's great benefits justify any small inconvenience. Banks, shopping malls, and government buildings are already equipped with security cameras, and no one has a problem with that. Why complain about the system used at sports events? One big difference is that it involves "biometric" technology. It analyzes physical traits to establish a person's identity, records the images, and instantly recognizes the people wherever they go.

Instead of humans analyzing a video to see who was depicted, machines do the identifying. Advocates of biometric systems say this makes the system more scientific. Computers can compare exact measurements of facial features in order to avoid mistakes. Opponents of such systems object. They argue that machines are easily fooled by such simple devices as hats, glasses, makeup, or new hairstyles. Humans are a lot better at recognizing individuals, they say, than computer systems are.

【3】41. What is the primary reason for using facial recognition technology at sports events?

- ① To help locate lost spectators in large stadiums.
- ② To analyze crowd behavior for commercial purposes.
- ③ To identify potential troublemakers for venue security.
- ④ To keep track of the attendance of ticket holders.

【1】42. What concern do critics have about using facial recognition at sports venues?

- ① It could falsely identify innocent people as criminals.
- ② Human employees would lose their jobs as security personnel.
- ③ It may increase the cost of tickets for spectators.
- ④ People would worry about how they look on camera.

【1】43. How do supporters justify the use of biometric surveillance at sports events?

- ① It is already adopted in other places without issues.
- ② It helps sports teams understand fan demographics.
- ③ It allows for faster ticketing and entry into events.
- ④ It provides more accurate data about the event attendees.

【4】44. What is one of the limitations opponents of biometric systems argue about?

- ① Those systems can't work well when used in large crowds with similar skin colors.
- ② Poor lighting conditions would compromise the effectiveness of face matching.
- ③ Computers may be hacked or be out of function when losing electric power.
- ④ Machines are easily deceived by changes in a person's appearance or wears.

【2】45. What do proponents of biometric systems claim is an advantage over humans?

- ① Computers take much shorter time in screening large amounts of video footage.
- ② Computers are more precise in matching facial traits, reducing human error.
- ③ Computers can detect and analyze people's emotions better than humans.
- ④ Computers can store data about people's faces in large quantity and for very long time.

第二篇：

Since the 1970s, meditation and other stress-reduction techniques have been studied as possible treatments for depression and anxiety. One such practice, yoga, has received less attention in the medical literature, though it has become increasingly popular in recent decades. One national survey estimated, for example, that about 7.5% of U.S. adults had tried yoga at least once, and that nearly 4% practiced yoga in the previous year.

Yoga classes can vary from gentle and accommodating to strenuous and challenging; the choice of style tends to be based on physical ability and personal preference. Hatha yoga, the most common type of yoga practiced in the United States, combines three elements: physical poses, controlled breathing, and a short period of deep relaxation or meditation. Available reviews of a wide range of yoga practices suggest they can reduce the impact of exaggerated stress responses and may be helpful for both anxiety and depression. In this respect, yoga functions like other self-soothing techniques, such as meditation, relaxation, exercise, or even socializing with friends. By reducing perceived stress and anxiety, yoga appears to moderate stress response systems. This, in turn, decreases physiological arousal—for example, reducing the heart rate, lowering blood pressure, and easing respiration. There is also evidence that yoga practices help increase heart rate variability, an indicator of the body's ability to respond to stress more flexibly.

Although many forms of yoga practice are safe, some are strenuous and may not be appropriate for everyone. In particular, elderly patients or those with mobility problems may want to check first with a clinician before choosing yoga as a treatment option. But for many patients dealing with depression, anxiety, or stress, yoga may be a very appealing way to better manage symptoms. Indeed, the scientific study of yoga demonstrates that mental and physical health are not just closely related, but are essentially equivalent. The evidence is growing that yoga practice is a relatively low-risk, high-yield approach to improving overall health.

【3】46. What is the passage mainly about?

- ① The origin of yoga.
- ② Why yoga is popular in the U.S.
- ③ The benefits of yoga.
- ④ What forms of yoga training are available in the U.S.

【4】47. Which of the following is **NOT** included in the most common type of yoga in the U.S.?

- ① Physical poses
- ② Meditation
- ③ Controlled breathing
- ④ Mental diagnosis

【1】48. Which of the following is true?

- ① Yoga can provide similar benefits to exercising and socializing with friends.
- ② Yoga can improve mental health, but not physical health.
- ③ Yoga has been widely studied by medical researchers since the 1970s.
- ④ Yoga relaxes people and is therefore suitable for everyone.

【3】49. Which question is answered by the passage?

- ① What forms of yoga practice are the best for children?
- ② When did people start practicing yoga?
- ③ How does yoga benefit mental health?
- ④ How do people choose the right yoga instructor?

【4】50. Where does the author mention something people need to pay attention to before practicing yoga?

- ① The first paragraph.
- ② The end of the second paragraph.
- ③ The first and third paragraphs.
- ④ The third paragraph.
